DETAILED ACTION

Response to Amendment

1. The amendment After Final filed June 26, 2008 has been entered and claims 13-17 and 28 have been cancelled.

Priority

2. Submission of the translation of the foreign language application (JP 2000-245989, filed 8/14/2000) is acknowledged.

Allowable Subject Matter

3. Claims 1-12 and 18-27 are allowed.
4. The following is an examiner's statement of reasons for allowance: Tanaka et al. ("Tanaka") WO 99/28784, a closely related art, discloses a first semiconductor film; a second semiconductor film/semiconductor film; a first electrode; an insulating film or a gate insulating film formed on said first electrode; a first contact hole which is provided in said insulating film and has a depth so as to reach said first electrode; a gate wiring which is formed on said insulating film and connected with said first electrode through said first contact hole; a second electrode provided on said insulating film, wherein said first electrode overlaps with said second electrode. However Tanaka does not teach the following:

That the gate wiring which is formed on said insulating film and connected with said first electrode through said first contact hole is also connected with a third electrode through a second contact hole, wherein the first and the third electrodes are each formed in different pixels as required by independent claims 1 and 5.

That the gate insulating film be provided on said first semiconductor film and said second semiconductor film; a storage capacitor is constructed by said first electrode, said gate insulating film and said second semiconductor film as required by independent claim 9.

That the gate insulating film be provided on said semiconductor film; a storage capacitor is constructed by said first electrode, said gate insulating film and said semiconductor film and overlapped at 90% or more of an area thereof with said second electrode as required by independent claim 18.

That the gate insulating film be provided on said first semiconductor film and said second semiconductor film; a storage capacitor is constructed by said first electrode, said gate insulating film and said second semiconductor film and overlapped at 90% or more of an area thereof with said second electrode as required by independent claim 23.

The above limitations in combination with other claim limitations are not taught or fairly suggested by the prior art nor would it be obvious to modify the references of record so as to yield the device of the instant application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ahmed Sefer whose telephone number is (571)272-1921.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sue Purvis can be reached on (571) 272-1236.
